

Agency's Texas Academic Achievement Scores (TAAS) test. These tests in Texas gauge our children's progress in learning, as well as the progress by school boards to incorporate various teaching techniques into the curriculum.

The first year I went there, I urged them to do well on their TAAS tests, telling them if they did well, I would come back to urge them on for the next year. They did well, and I went back the next year. It has become a matter of habit for us now, Villareal Elementary scoring high on their TAAS, and their local congressman coming back to shout bravo for their efforts.

Perhaps it will be helpful to explain why this school district does so well academically. This is a school district with a creative and energetic leader, Dr. Eliseo Ruiz, the superintendent of LFCISD, who attributes the high academic achievements to "purposely setting some very high goals."

Dr. Ruiz was named one of 10 "exemplary superintendents" in Texas, and the school district itself ranked fourth in the state in the education of Hispanics, according to research by Texas A&M University. According to Dr. Ruiz, the stars began to line up for the school district about four years ago when they began aligning curriculum, establishing timelines and monitoring benchmarks.

He insists that a greater parental involvement was the key to the schools' collective success. Each school requires a parents' fair at the beginning of the year, followed by various keynote speakers to parents about how to work with children in learning responsibility. Once again, we have an example of what really works in our nation's schools . . . parental involvement from the beginning to the end.

While Congress labors mightily today to complete our work for the year, be aware of the fact that there is a school which very much wanted their congressman to see them today. For the RECORD, their congressman wants very much to see them today; they never fail to move me and inspire me.

AUTOMOBILE NATIONAL HERITAGE ACT OF 1998

SPEECH OF

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Saturday, October 10, 1998

Mr. DINGELL. Mr. Speaker, I would like to thank Representative HANSEN for bringing this legislation before the House for consideration. I am deeply grateful for his support and the work he has done on H.R. 3910.

The industrial, cultural, and natural heritage legacies of Michigan's automobile industry are nationally significant; they have made this a greater country. In cities across Michigan, such as Detroit, Dearborn, Flint, Kalamazoo, Lansing, and Saginaw, the automobile was designed and manufactured and in turn helped establish and expand the United States as an industrial power. The industrial strength of automobile manufacturing was vital to defending freedom and democracy in two world wars and fueled our economic growth in the modern era.

Automobile heritage is more than the assembly lines and engineering rooms where

cars were created and built. Turning a vision into a reality, the story of the automobile is a tale of hard work and growth. It is the shared history of millions of Americans who fought, during the labor movement, for good wages and benefits. This industry shaped 20th Century America like no other; it is the quintessential American story. It is a story worth celebrating and sharing.

The end product of all this hard work and cooperation, the Automobile National Heritage Area, creates something special and lasting both for Michigan and America. Again, I thank my colleague from Utah, Representative HANSEN, along with Chairman DON YOUNG. The gentleman from Utah has done a superb job, and I salute him. I say to my colleagues from both sides of the aisle, and from all regions of America, that the Automobile National Heritage Area will enormously benefit the people of the 16th District in the State of Michigan and those who work in and are dependent upon the auto industry. This area is very, very important to us in Michigan in terms of remembering our history, who we are, and what we have done to build America.

But all these efforts in Washington would not have come about if not for the years of planning by educators, local officials, and business leaders to bring together—in one package—a way to preserve this story. These local, grassroots efforts have been supported by many organizations in Michigan, including our major automobile manufacturers, labor organizations, businesses, towns and cities, chambers of commerce, and elected officials from both parties. There are too many individuals to thank today. But I would like to extend my gratitude to Ed Bagale of the University of Michigan-Dearborn, Steve Hamp of the Henry Ford Museum, Sandra Clark of the State of Michigan, Maud Lyon of the Detroit Historical Museum, Bill Chapin, and Barbara Nelson-Jameson of the National Parks Service.

I urge my colleagues to support the rich history and tradition of the automobile. Support this unique American story. Support H.R. 3910.

DIGITAL MILLENNIUM COPYRIGHT ACT

SPEECH OF

HON. TOM BILEY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, October 12,
1998***SHD***Clarification of Provisions of H.R. 2281 Relating to Stock Market Data*

Mr. BILEY. Madam Speaker, I rise to correct a clerical error that resulted in the omission of an important portion of my statement of August 4, 1998 in support of H.R. 2281.

In my statement, I had included clarification of certain portions of the legislation that provide for the protection of electronic databases, specifically with respect to entities that collect and disseminate information about our stock markets.

I supported this legislation because my good friend, Chairman HYDE of the Judiciary Committee, agreed to my request to include provisions that ensure that the protections provided in the Act in no way undermine or affect the provisions of the Federal securities laws

relating to the collection and dissemination of information about the stock market.

Section 11A of the Securities and Exchange Act of 1934, and the rules promulgated thereunder, charge the Securities and Exchange Commission with the duty to assure the prompt, accurate, reliable and fair collection, processing, distribution, and publication of information about stock quotes and transactions. The ability and extent to which self-regulatory organizations such as stock exchanges may collect fees for the dissemination of this information is subject to the approval of the Commission. Pursuant to this authority, the Commission has, in the past, approved of fees charged for stock market quotations by self-regulatory organizations such as stock exchanges, which have used these fees to fund the collection and distribution of market data pursuant to the requirements of the Exchange Act, among other activities.

Similarly, pursuant to the authority granted it under Section 11A of the Exchange Act, the Commission may, in the future, reexamine the fee structure associated with the dissemination of market data to better serve the public interest, protect investors, and promote efficiency, competition, and capital formation. The legislation explicitly preserves the ability of the Commission to take such action, with respect to both real-time and delayed data. In this regard, I wish to emphasize that this legislation does not create a property right in either real-time or delayed market data for self regulatory organizations, and preserves the full and complete authority of the Commission over the ways in which stock market data is collected and disseminated.

This is critical because some experts have described stock quotation information as being "as necessary as oxygen" to investors, especially as investors turn more and more frequently to their computers to invest on-line.

As the Internet and electronic communication make it increasingly easier for investors to seek out information about the marketplace and participate in our stock markets, we must ensure that these technological advances provide maximum access to information for investors, consistent with the competitive and efficient functioning of our marketplace.

In this regard, I intend to continue the Committee's vigorous oversight of this important area to ensure that the Commission is using its authority under the Exchange Act to ensure that fees that are charged for market data neither hamper the development of the most efficient means for investors, especially retail investors, to obtain this information nor undermine the ability of the stock markets to fulfill their obligation to provide it.

CELEBRATION OF POLISH- AMERICAN HERITAGE MONTH

HON. STEVEN R. ROTHMAN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 13, 1998

Mr. ROTHMAN. Mr. Speaker, I rise today to mark Polish-American Heritage Month which is being celebrated throughout our nation during the entire month of October. For seventeen consecutive years, the more than one million Polish-Americans in New Jersey have participated in events that honor and recognize the remarkable accomplishments of the Polish-American community.
